

COST OF IRAQ REPORT

A special report from MoveOn.org Political Action
Data from the National Priorities Project

Nearly four years after Congress voted to authorize the Iraq war, it is time for President Bush's Republican allies in Congress to recognize the impact of the continuing occupation of Iraq on American taxpayers—and its impact on this nation's priorities. We need a new direction—not more of the same.

At the same time billions has been spent in Iraq, Congress has short-changed important priorities. They under-funded No Child Left Behind and left a giant hole in funding for prescription drugs for seniors through Medicare. Student loan funding was cut and investments in homeland security have been short-changed. We haven't even provided our troops the equipment they need like modern body armor and helmets. Veterans returning from Iraq face higher costs for their health care.

All of this points to a Congress whose fiscal priorities are focused thousands of miles away in Iraq—rather than back here in America. This report, using data provided by the National Priorities Project, details the cost of the war to every congressional district in America and reminds us what we were told, the realities of what happened and what lies ahead.

Total Cost of the War	\$300 billion and counting
	\$10 billion a month
	\$2 billion a week
	\$267 million a day
	\$11 million an hour

REMEMBER WHAT THEY TOLD US ABOUT THE COST

The Bush Administration Mised the American Taxpayers:

- Secretary of Defense Donald Rumsfeld: "It could last six days, six weeks. I doubt six months." [February 7, 2003]
- Vice President Cheney: "I think it will go relatively quickly . . . (in) weeks rather than months" [March 16, 2003, NBC's *Meet the Press*]
- Joint Chiefs of Staff Chairman Gen. Richard Myers: "What you'd like to do is have it be a short, short conflict. ... Iraq is much weaker than they were back in the '90s," when its forces were routed from Kuwait. [March 4, 2003]

- OMB Director Mitch Daniels: “The administration’s top budget [Mitch Daniels] official estimated today that the cost of a war with Iraq could be in the range of \$50 billion to \$60 billion...” [New York Times, 12/31/02]
- In late 2002, months before the Iraq war started, the Bush administration rebuked its own chief economic adviser, Lawrence Lindsey, for publicly estimating that a war in Iraq might cost \$100 billion to \$200 billion. [San Francisco Chronicle, 5/9/04]

A LOOK AT THE NUMBERS SHOWS A TOTALLY DIFFERENT RESULT

Where We Are:

- With the passage of the FY 2006 supplemental appropriations bill, Congress has so far appropriated about \$319 billion for the war in Iraq. [Congressional Research Service, 6/14/06]
- A Congressional Budget Office analysis concluded that since 2003, \$291 billion has been spent on the war in Iraq. [National Journal’s Congress Daily, 7/14/06]
- The Iraq operation has already cost far more than the 1991 Persian Gulf War – which cost about \$89 billion in FY 2007 dollars. It is quite possible that the United States will ultimately spend more on U.S. military operations in Iraq and Afghanistan than it did on the Korean War - \$455 billion - or the Vietnam War - \$650 billion. [Center for Strategic and Budgetary Assessments, 3/20/06]

What Lies Ahead:

- An analysis by the Congressional Budget Office predicted that if the United States keeps forces in Iraq through the end of 2009, an additional \$166 billion in Department of Defense funding would be necessary over the FY 2007-16 period. CBO predicted that if the United States reduces its deployed forces in Iraq to 40,000 after 2010 and keeps it at that level through 2016, an additional \$368 billion in Department of Defense funding would be necessary over the FY 2007-16 period. [Congressional Budget Office, 7/13/06]
- Columbia University economist Joseph E. Stiglitz and Harvard lecturer Linda Bilmes predicted the cost of the Iraq war could top \$2 trillion – assuming the U.S. mission in Iraq lasts until 2010, with a steadily declining number of U.S. troops each year - after factoring in long-term healthcare for wounded U.S. veterans, rebuilding a worn-down military, and accounting for other unforeseen bills and economic losses. The figure is more than four times what the war was expected to cost through 2006. [Boston Globe, 1/8/06]
- It is estimated that between 18 and 28 billion in additional funding will be needed to complete all or most of the objectives for reconstruction identified after the invasion. Even assuming that this gap could be covered by drawing equally upon U.S., international and Iraqi resources, an additional \$5-10 billion in U.S. reconstruction

assistance would still need to be provided. [Center for Strategic and Budgetary Assessments, 2/27/06]

- According to a 2005 report by the Office of the Special Inspector General for Iraq Reconstruction (SIGIR), a survey of about 100 reconstruction projects indicated that actual costs have typically exceeded initial estimates by some 20-85 percent. The SIGIR data suggest that at least \$60 billion would be needed to complete the reconstruction projects outlined in 2003. In 2006, the Special Inspector General for Iraq Reconstruction warned that the United States faces a “reconstruction gap...the difference between what was originally planned for reconstruction in the various sectors and what actually will be delivered.” [SIGIR Report to Congress, 4/30/05; SIGIR Quarterly Report, 1/30/06]

WHERE HAS THE MONEY GONE?

Empty Promises of Reconstruction Efforts:

- About 30 billion of taxpayer dollars and 20 billion in Iraqi funds have been spent so far by the Bush Administration to rebuild Iraq. However, today, services in Iraq – oil production, electricity and drinkable water – remain at pre-war levels. [*Dollars Not Sense, Government Contracting Under the Bush Administration*, U.S. House of Representatives Committee on Government Reform, Minority Staff, Special Investigations Division Report, 6/06]

Billions of Dollars to Contractors Who Have Not Been Held Accountable:

- Since 2001, Halliburton has been paid more than \$10 billion for its work in providing the military with support operations. [St. Petersburg Times, 7/16/06]
- There have been three contracts awarded to Halliburton/KBR - totaling more than \$18.4 billion - since the beginning of the war in Iraq - two of which were no-bid contracts. The first no-bid contract was for supplies for U.S. troops. The second no-bid contract was for fuel and oil industry repairs. The third contract, awarded in January 2004 after a competitive bidding process, was for the repair of oil fields in Southern Iraq. [Los Angeles Times, 3/29/06; *Dollars Not Sense, Government Contracting Under the Bush Administration*, U.S. House of Representatives Committee on Government Reform, Minority Staff, Special Investigations Division Report, 6/06]

Billions of Dollars Have Been Lost:

- According to an audit by the Special Inspector General for Iraq Reconstruction, nearly \$9 billion of money spent on Iraqi reconstruction is unaccounted for because of inefficiencies and bad management. The report concluded that \$8.8 billion was reported to have been spent on salaries, operating and capital expenditures, and reconstruction projects between October 2003 and June 2004. The money came from revenues from the

United Nations' former oil-for-food program, oil sales and seized assets. Auditors were unable to verify that the Iraqi money was spent for its intended purpose. In one case, they raised the possibility that thousands of "ghost employees" were on an unnamed ministry's payroll. [CNN.com, 1/31/05]

MISPLACED PRIORITIES: WHAT THE MONEY HASN'T BEEN SPENT ON

What We Could Have Paid for Instead:

- More than 40 million children to attend a year of Head Start [National Priorities Project, 8/06]
- Health insurance for more than 185 million children for one year [National Priorities Project, 8/06]
- Four-year scholarships at public universities for nearly 15 million students [National Priorities Project, 8/06]
- Hiring more than 5 million additional public school teachers for one year [National Priorities Project, 8/06]
- Clean up all contaminated sites in the U.S.—EPA estimates approximately 350,000 over the next 30 years. [Minority Appropriations Committee Staff, 7/06]

Or, Use Only Some of What Has Been Spent for Homeland Security

- Equip commercial airliners with defenses against shoulder fired missile--\$10 billion or approximately 5 weeks in Iraq. [Minority Appropriations Committee Staff, 7/06]
- International aid needed to rebuild Afghanistan--\$8.6 billion or approximately one month in Iraq. [Minority Appropriations Committee Staff, 7/06]
- Capital improvements to secure public transportation (trains, subways, buses) against terrorist attacks--\$5.2 billion or approximately 3 weeks in Iraq. [Minority Appropriations Committee Staff, 7/06]
- Radiation detectors needed at all U.S. ports to scan 100% of cargo (rejected due to cost)--\$1.5 billion or 5 days in Iraq. [Minority Appropriations Committee Staff, 7/06]
- Make all emergency radio systems interoperable as recommended by the 9/11 commission--\$350 million or 1.2 days in Iraq. [Minority Appropriations Committee Staff, 7/06]
- Start 100% screening of air cargo—just like we screen passengers--\$700 million or 2 days in Iraq. [Minority Appropriations Committee Staff, 7/06]

Or, start to take care of our returning veterans

- Eliminate new costly co-pays and premiums forced on veterans--\$2.5 billion or 9 days in Iraq. [Minority Appropriations Committee Staff, 7/06]
- Fully fund mental health research for veterans--\$100 million or 9 hours in Iraq. [Minority Appropriations Committee Staff, 7/06]
- Medical and prosthetic research for veterans--\$48 million or less than 5 hours in Iraq. [Minority Appropriations Committee Staff, 7/06]

Data Sources

Unless otherwise indicated, the figures provided for the cost of the war for each district and specific tradeoffs are all from the National Priorities Project on the web at www.nationalpriorities.org.

###

Attachment: Chart of the cost of the war by district with tradeoffs. The trade-offs listed represent each congressional district's share of the cost that could be used to fund other priorities facing the entire country. For example, we indicate how the money each district spent on the war could be used to provide health care for children across the entire country.

Cost of Iraq By District With Tradeoffs

District	State	Share of the Cost	Children with Health Care	Affordable Housing	School Teachers	People with Health Care	New Schools	Scholarship for College Students	Public Safety Officers	Homes with Renewable Electricity	Port Inspectors
